How we can help

Guidance on Infection Control in Schools, 2016

Handwashing is one of the most important ways of controlling the spread of infections, especially those that cause diarrhoea and vomiting, and respiratory disease.

- ✔ The recommended method is the use of liquid soap, warm water and paper towels
- ✔ Always wash hands after using the toilet, before eating or handling food, and after handling animals

WE CAN HELP

Traditionally, our most in-demand services for colleges and universities have included washroom maintenance, floorcare and hygiene services. Our experts continue to meet the needs of institutions in this sector with a wide range of products and services.

Avoid accidents in busy areas

- Slips and trips account for the largest percentage of workplace accidents – a risk that increases in busy environments such as universities and colleges. **phs** can help with a range of floorcare solutions, including mats that soak up dirt and moisture to avoid slippery floors in public areas.

Make the right impression on prospective students

- In order to attract the best and brightest students, universities and colleges need to make a positive first impression. Clean, presentable buildings are a basic necessity in this regard. With everything from pleasantly scented air fresheners to toilet cubicle maintenance services, **phs** can help to ensure that your establishment is perceived in a positive light.

Reduce the risk of 'freshers' flu'

- With new students regularly contracting illnesses at the beginning of the academic year, adequate hygiene facilities are vital for the wellbeing of everyone attending college or university. **phs** can provide essential hygiene products including soap and surface sanitiser to help your student population remain healthy and free of infection.

Take the hassle out of washroom maintenance

- Failing to look after the washrooms within your establishment can have numerous negative effects on students and staff, not to mention the reputation of your college or university. Allow **phs'** fully-accredited service team to take care of your toilets – we can provide regular service visits to ensure that your washrooms remain hygienic and functional.

For students to have the best chance of success in their studies, it is vital that the colleges and universities they attend provide facilities that promote a hygienic and safe environment for learning.

Poor hygiene can lead to the spread of infection, negative feedback from students and staff, and a bad reputation for your college or university. But with limited budgets and working hours, this is an area that often ends up being neglected.

We work with over **1,400** colleges and universities throughout the UK, providing convenient and affordable services that help to keep hygiene and cleanliness at desirable levels within your institution.

Did you know?
By installing the right products, **phs** can help your college or university to reduce water and energy bills, as well as reducing your environmental impact.

Healthcare, washroom and floorcare hygiene is our business. We stay on top of all the legislative developments affecting your industry to provide you with expert advice on what you need to do to ensure that your business is legally compliant.

Our professional service drivers provide a discreet and efficient service, calling ahead to check that our servicing times are convenient for your business. And, if any of your products or services need change, we're just a call away and have the flexibility to adapt to whatever is needed.

We're in every geographical area and because we're **Next door. Everywhere**, we are on hand to help wherever you are. And as a single supplier, meeting all your needs, we can help reduce your day-to-day administration commitment as well as your financial costs.

Our university building blueprint shows the most in-demand services that we currently provide to the higher education sector.

Adhere to legislation

We will ensure that safety and hygiene at your college or university is handled strictly in line with current legislation and according to best practice guidelines
