

## COVID-secure product guide

Everything you need to keep your premises safe

---

## > Future proof your **business**

The way we live and work dramatically changed in March 2020, when the UK went into its first COVID-19 national lockdown. Since then, our lives have continued to change on a regular basis, as we learn more about the virus and adapt how we live accordingly.

The Coronavirus Pandemic has taught us valuable lessons about planning for the unknown. But how can we even prepare for what we don't know?

By focusing on the way germs and viruses are transmitted, through the air and on surfaces, we can keep

interior environments safe and hygienic for all.

Investing in cost-effective and long-term hygiene solutions can reduce the risk of viruses entering your business premises, while increasing consumer confidence and employee morale.

## AERAMAX air purification devices

Giving you a breath of fresh air.

**phs AERAMAX® PROFESSIONAL III** removes up to 99.99% of harmful viruses, germs, allergens, odours and particulates from the air, safely and easily.

True HEPA filtration then traps up to 99.99% of any remaining airborne pollutants. The Antimicrobial treatment on the HEPA filter effectively reduces the development of bacteria and fungi on the filter. We spend 90% of our time indoors and nine hours every day sharing spaces with others.

While we may not give much thought to indoor air quality, we certainly should. The air we breathe indoors is up to five times more polluted than outdoor air.

The **phs AERAMAX® PROFESSIONAL** range removes up to 99.99% of harmful viruses, germs, allergens, odours, and particulates from the air. True HEPA filtration then trap up to 99.99% of any remaining airborne pollutants.

The Antimicrobial treatment on the HEPA filter effectively reduces the development of bacteria and fungi on the filter.

## What makes this product COVID-secure?

### Benefits:

- HEPA filtration cleans the air, safely and easily removing 99.99% of harmful germs, allergens and particulates, and Carbon filtration adsorbs unwanted odours.
- Intelligent sensors detect sound, motion and odour and automatically adjusts the optimum performance.
- Designed to seamlessly and safely integrate into your facility's environment. Units can be mounted onto any wall, providing worry free air purification where it's needed most.
